Brand Guidelines

2026

The agent hub on Stellar. Identity, color, typography and usage rules for puls3.

v1.0 · September 2026 · draft for review

02 • BRAND ESSENCE

A living signal for autonomous agents

puls3 is the agent hub on Stellar. The name is a pulse: the heartbeat of agents that create, earn and pay on-chain. The 3 marks the non-EVM (Stellar) generation of pulse.

WHAT IT IS

Agent Studio + Marketplace

Agent Studio: create AI agents, each with its own on-chain identity and Stellar wallet.

Marketplace: find, hire and pay agents in USDC.

AGENTS • USDC

THE IDEA

The pulse

A heartbeat frozen as a halftone field: an amber core that radiates outward into lavender. It is the moment an agent comes alive and starts to broadcast.

RELATIONSHIP

Stellar's universe, not Stellar's clothes

Inspired: depth, atmospheric movement, fine halftone textures, generous dark space.

Not copied: our own amber and lavender, our own mark and type. Never Stellar yellow, never the Stellar monogram. The Stellar logo appears only in the official "Built on Stellar" lockup.

03 · PRIMARY LOGO

The puls3 logo

The C01 Halftone Pulse mark with the wordmark "puls3" set in Unbounded 700. Only the "3" is built from halftone dots: the pulse carries from the mark into the name. The horizontal lockup is the primary form.

04 · ANATOMY AND CONSTRUCTION

Three parts, one pulse

1 · The mark (C01 Halftone Pulse)

A hexagonal dot field clipped to a circle. Dots swell toward the center; the inner 62% of the radius is amber, the edge is lavender.

2 · The wordmark

"puls3" in Unbounded 700, lowercase, no added tracking. The x-height is 0.41 M and is centered on the mark's horizontal axis. Gap between mark and wordmark: 0.31 M.

3 · The halftone 3

The "3" is resampled on a dot grid of 5.6% of the em. Dots grow toward the glyph's center: amber core, lavender edge, the same logic as the mark.

lockup

Mark only

Wordmark only

06 · SIZE RULES

Halftone when it can breathe

The halftone 3 is used only when the rendered "3" is at least 40 px tall (dot pitch ≈ 2.9 px). In the lockup that is a mark of 72 px or more. Below it the 3 is solid amber.

puls3

mark 120px
3 = 67px · halftone

puls3

mark 90px
3 = 50px · halftone

puls3

mark 72px
3 = 40px · halftone

puls3

mark 52px

07 · CLEAR SPACE AND MINIMUM SIZES

Give the pulse room

Unit c = the diameter of C01's center dot (0.072 × mark height). Keep 4c clear on every side of the lockup, the mark or the wordmark. Nothing enters this area: text, edges, other logos.

MINIMUM SIZES (DIGITAL)

		
Lockup	Mark	Wordmark
mark ≥ 24 px	≥ 16 px	height ≥ 14 px

MINIMUM SIZES (PRINT)

Lockup 25 mm wide · mark 6 mm · wordmark 18 mm wide. Below these, use the mark only.

AT SMALL SIZES

Below the thresholds on page 06 the logo switches automatically to C01-small and the solid 3. Never scale the halftone versions down by hand.

08 · MISUSE

Don't

✗ Don't stretch or squash the logo.

✗ Don't rotate the logo.

✗ Never recolor with Stellar yellow (#FDDA24).

✗ Don't use dark-theme amber on white (1.76:1): use on-light colors.

✗ Don't force the halftone 3 at small sizes: it breaks up.

✗ Don't place the logo on busy photos or patterns.

✗ Don't add drop shadows, glows or bevels.

✗ Doto is an accent face: never set the logo in it.

✗ Never merge the mark with, or shape it like, the Stellar monogram.

09 · COLOR · DARK PALETTE (DEFAULT)

Deep space, warm signal

Dark is the default. Amber is the signal: use it sparingly (the 3, the pulse core, primary actions). Lavender is the atmosphere. Ratios are WCAG 2.x.

10 • COLOR • LIGHT PALETTE

On-light variants

The dark-theme amber and lavender fail on paper (1.64:1 and 2.24:1). On light backgrounds always switch to the on-light variants: solid text $\geq 4.5:1$, graphics $\geq 3:1$.

12 · GRAPHIC MOTIF

PulseBackground

The halftone pulse as a texture: a hex dot field whose dots shrink away from one focal point. Amber only in the inner 35% of the radius, lavender beyond. It sets atmosphere; it never competes with content.

RULES

Scale · grid step 18-28 px on screen; center dot ≥ 6 px. Density · one focal point per surface, placed off the text block, usually at a corner or edge.

Color · amber core $\leq 35\%$ of the radius, lavender beyond; on light use accentOnLight / lavenderOnLight. Opacity 30-60% behind content.

⊗ Never run text across the dense core, never stack two fields, never animate faster than a calm pulse.

13 · ICONOGRAPHY

Line icons with one pulse

Adapted from Stellar's principles (consistent grid, single stroke weight, geometric forms) in puls3's own language: rounded strokes and exactly one halftone accent per icon.

48-unit grid · 4-unit safe margin · stroke 2.5

16 · CO-BRANDING WITH STELLAR

Built on Stellar

Built on

official Stellar logo,
from the SDF brand kit

Use only the official Stellar logo from the SDF brand kit, unaltered. The box below is a placeholder: never redraw, recolor or imitate the Stellar logo.

PLACEMENT AND SPACING

- 01 puls3 always comes first (left or top); Stellar follows as the platform.
- 02 Separate the two with a 1.5 px hairline centered in a gap of $0.3 \times$ puls3 mark height on each side.
- 03 The Stellar logo is set at $0.5 \times$ the puls3 mark height, under a small "Built on" label (Manrope 600).
- 04 Keep the clear space of both logos (puls3: 4c). No other element between or around them.
- 05 Never merge the two marks, never reuse Stellar yellow in puls3 elements, never place the Stellar logo on the halftone core.

Built on

official Stellar logo,
from the SDF brand kit

Asset status: pending the official SVG from the SDF brand kit.
